FOR IMMEDIATE RELEASE January 6, 2015

## PRO GUARD ENTER INTO SUPPLY CONTRACT WITH BLUE MOBILE SYSTEMS

## ProGuard selects GuardTools® as the Tour System

San Francisco, CA, January 6, 2015 – Pro Guard enters into a supply contract with Blue Mobile Systems.

Pro Guard Security, a premier provider of security services in the Bay Area, is pleased to announce that the company has entered into a preferred supplier contract with Blue Mobile Systems.

ProGuard has entered into a preferred supplier agreement with Blue Mobile System who will be providing ProGuard with a complete operational tour system by the name GuardTools®. The tour system is an industry leading product and will enable ProGuard to further enhance the quality of services delivered to their clients. The tour system is a fully integrated system, which supports the ongoing operations and communications between the officers in the field, the back office and the client. The client can access and supervise in real time the tasks performed in the field and be notified immediately in the case of an emergency or escalation of a situation.

"Implementing and rolling out the GuardTools® system throughout the company will enhance the level of control we have of our assets in the field and allow us to fully integrate our operation with the clients' changing security needs", says Nils Welin, CEO of ProGuard Security. "As a technology driven company, the evaluation and implementation of new and useful technology is key in keeping our competitive advantages in the industry".

"The type of clients and the focus on operational excellency within ProGuard, makes them a perfect match for our product", says Leo De Meere, CEO for Blue Mobile Systems. "Having worked with Nils Welin at his prior company, we know that our technology will be used to its fullest capacity. We are very pleased to have ProGuard as our launch customer in the CA market".

Another benefit of the GuardTools® system is it auto-reporting functionality; allowing the officer on-site to automatically generate more frequent and accurate reports. This benefits the entire operational chain of command by reducing – if not eliminating – the need for time-consuming paper reports.

## **About ProGuard**

Founded in 1998, ProGuard Security provides unmatched level of customer service in the delivery of quality contract security services. The company offers a highly integrated security solution with a high level of automation and technology built into the delivery of quality security services.
